

Are your wounds too
dry or too moist?

Do you want to eliminate
wound pain?

Reach for Just One PolyMem® - THE PROVEN MULTIFUNCTIONAL DRESSING

Many of your colleagues demand PolyMem dressings because proper use of the dressings:

- Optimize wound moisture, both absorbing and donating moisture, as required
- Help to reduce persistent wound and periwound pain
- Minimize pain associated with manual wound bed cleansing, dressing removal and re-application
- Help to reduce swelling, bruising, inflammation and pain, even when applied over unbroken skin
- Eliminate the need to "peek" under a dressing or unnecessarily change early
- Streamline wound care and reduce cost

No other dressing has been shown to deliver these outstanding results on so many different wound types. Visit <http://www.polymem.com/A1.asp> to learn more about the PolyMem dressings and their proper use.

Experience the Quality and Performance you
should expect from a Wound Dressing
