

PolyMem®

This information is provided in response to a request for a Safety Data Sheet (SDS) for PolyMem wound dressings manufactured by Ferris Mfg. Corp. Upon review of the relevant regulations (such as OSHA 29 CFR 1910.1200) and the properties of PolyMem, Ferris has determined that an SDS is not required and is discouraged. PolyMem poses no health hazard or physical hazard. In addition, PolyMem is a manufactured "article."

PolyMem dressings are safe to use for wound care of patients. PolyMem dressings release no hazardous chemicals. PolyMem dressings have been tested and comply with the material biosafety requirements of ISO 10993, and were found to be non-irritating, non-sensitizing, and noncytotoxic.

PolyMem dressings do not pose a physical hazard or health risk to health care employees.

Please consult the instructions for use (IFU) included in each box of PolyMem dressings for information regarding composition and safe use practices. If you have questions, please contact your sales or customer service representative.
