Get them back in the game faster.
SportsWrap® by PolyMem® Benefits You and Your Athletes

Getting your athletes back in the game is one of your main objectives. You know how important it is to control the spread of the acute inflammatory process and regain full range of motion, muscle strength and power. What you may not know is that SportsWrap dressings have become the preferred wrap for world-renowned sports medicine professionals and elite athletes.

SportsWrap dressings were created specifically to manage athletic injuries. For you, that means quicker (more effective) management of the injury. For your athlete, that means a quicker return to game-level performance.

Sports medicine professionals worldwide in professional and amateur sports are using SportsWrap, including:
- Professional sports organizations
- Collegiate & high school teams
- Elite athletes

SportsWrap works in three specific steps to accelerate the return to play:

**ACUTE MANAGEMENT**
In all athletic injuries, pain and inflammation run hand-in-hand. Fortunately, SportsWrap helps to inhibit the action of nociceptors to help interrupt the pain mechanism. From the onset of application, SportsWrap helps suppress the spread of inflammation, swelling and bruising, and thereby helps reduce pain. Case studies indicate that pain is often relieved within as little as 30 minutes!

**SYMMPETRAL STRENGTH**
Range of motion (ROM) is directly related to levels of pain and inflammation. SportsWrap helps to localize the inflammatory reaction to the direct injury zone and helps avoid swelling into surrounding tissues. Once alleviated, ROM and strength exercises are possible.

**RETURN TO PLAY**
With an injury that is effectively treated, an athlete returns to play much more rapidly. SportsWrap helps get your athletes back in action.

DRUG-FREE* PAIN RELIEF
Here’s How it Works!

Strains, Sprains and Contusions – Where the Skin is Intact
Rigorous animal research studies show that SportsWrap and PolyMem dressings inhibit the action of nociceptors, the populous raw nerve endings found in the epidermis, thereby interrupting the mechanism of inflammation and pain.¹ ²

Study results revealed that “There is robust, reproducible and statistically significant decrease in both secondary mechanical and thermal hyperalgesia” when wounds were wrapped with polymeric membrane dressings.¹ Human case studies have revealed dramatic reductions in edema, ecchymosis (bruising) and pain in a wide array of athletic injuries.³

SportsWrap is non-sterile and should not be used on broken skin.

Benefits of SportsWrap by PolyMem:
- Supports the tissue, limb or joint
- Cushions and helps to protect from re-injury
- Helps to provide compression and stabilization
- Provides gentle counterpressure to skin surface
- Is comfortably snug without restricting blood flow
- Insulates from thermal and mechanical shock
- Retains warmth to encourage blood flow
- Protects skin from irritating stimulation and abrasion
- Absorbs perspiration from skin for comfort
- Moisturizes, lubricates and softens skin
- Drug-free* pain relief

For Open Wounds, Create an Optimal Healing Environment and Provide Pain Relief
Where athletes have open wounds, PolyMem or Shapes® by PolyMem dressings can be used alone or beneath SportsWrap. Shapes are pre-cut dressings that fit wounds right out of the package. PolyMem and Shapes are sterile, unique and drug-free dressings that have the following ingredients to help create the ideal healing environment.

GLYCERIN – Provides moisturizing and comfort
SURFACTANT – Cleanses the injured area
SUPERABSORBENT – Absorbs and holds fluids
SEMIPERMEABLE FILM BACKING – Protects and serves as a liquid barrier while allowing gas (O₂ and CO₂) exchange and vapor transmission

PolyMem and Shapes are also available with antimicrobial silver.
A first-round draft pick.
